ABOUT ME

Computer Engineering graduate building backend applications and REST APIs with Java/Spring Boot and C#/.NET. Experienced in database design, system integrations, and deployment on AWS.

EXPERIENCE

Software Development Intern

07/2026 – 08/2026

YAZ BILGI SISTEMLERİ [🌐](#)

ISTANBUL

- Developed a multi-tenant library management system using ABP Framework (.NET).
- Implemented CRUD services, DTOs, and permission definitions across the Domain, Application, and EF Core layers; managed the SQL Server schema through migrations.
- Integrated the Google Gemini API to build an in-app chat assistant, and set up automated email notifications for overdue books.

Backend Developer Intern

06/2025 – 07/2025

KAFEIN TECHNOLOGY [🌐](#)

ISTANBUL

- Designed a Java-based fluent API library covering 212 Keycloak Admin API endpoints.
- Built a modular service structure for managing users, roles, clients, realms, and authentication flows.
- Added Spring Boot auto-configuration so the library integrates into any project with a single line of configuration.

Backend Developer

09/2024 – 03/2025

BRAVE [🌐](#)

EDIRNE

- Developed RESTful APIs for web and mobile applications with Java & Spring Boot, working on database management and system integrations.
- Built REST services for QR-based venue check-in and interaction flows in the QRiend [🌐](#) app, along with WebSocket-based real-time messaging.
- Handled deployments on AWS EC2 and media storage on S3.

EDUCATION

TRAKYA UNIVERSITY

2021 – 2026

Computer Engineering

EDIRNE

SKILLS

Backend

- Java, Spring Boot
- C# (.NET), ABP Framework
- Hibernate / JPA
- RESTful API

Database

- MySQL
- PostgreSQL
- SQL Server

Cloud & DevOps

- AWS (EC2, S3, RDS)
- Docker

Tools

- Git
- Swagger / OpenAPI
- Postman
- Maven / Gradle

Automation

n8n (Workflow Automation)

Frontend

- React
- React Native

Machine Learning

- Python
- PyTorch, scikit-learn
- Pandas, NumPy

PROJECTS

Locaffy [🌐](#)

- Developed a REST API with Spring Boot, including services for location-based restaurant search, reservations, and user management.
- Built React web and React Native mobile clients on the same API, delivering the application end-to-end.
- Deployed to production on AWS EC2, using S3 for media and MySQL on AWS RDS for the database.

Keycloak Library

- Developed a library that can be added as a dependency to Spring Boot projects, enabling Keycloak management through single-line configuration.
- Designed a modular service structure providing user, role, client, and realm operations through a fluent API.

Football Player Analysis [🌐](#)

- Built an application that analyzes football players' match statistics, clusters them by playing style, and recommends similar players.
- Trained Autoencoder, Variational Autoencoder, and Self-Organizing Map models and compared their clustering performance.
